Property List and Table View
Founding Fathers of the US

Create a property list (plist) containing information about seven of the founding fathers of the United States. You will then read data from the plist and display the names and political party of the seven founding fathers.

Create a new single view application (for iPhone) named, *YourName*-FoundingFathers, where YourName is the first letting of your first name, followed by your last name. For example, *KWergesFoundingFathers*.

Create a property list to store the information indicated in the table below.
Within your project, create a plist: **File / New / New File**
Under iOS, click on Resources and select Property List. Name your file *FoundingFathers* in your project folder.

Click on the *FoundingFathers.plist* file in the Project Navigator area and begin adding keys and values. Structure your property list so that you have one root array with seven dictionaries. See sample plist structure below.

Key	Type	Value
▼ Root	Array	(7 items)
▼ Item 0	Dictionary	(8 items)
Number	Number	1
Name	String	John Adams
Title	String	2nd President of the U.S.
Years	String	1787–1801
Spouse	String	Abigail Smith
Party	String	Federalist
Image-cell	String	JAdams.jpg
Image	String	JAdams.jpg
▶ Item 1	Dictionary	(8 items)
▶ Item 2	Dictionary	(8 items)
▶ Item 3	Dictionary	(8 items)
▶ Item 4	Dictionary	(8 items)
▶ Item 5	Dictionary	(8 items)
▶ Item 6	Dictionary	(8 items)

Property List and Table View
Founding Fathers of the US

	Name and *Title*	Years in Office	Spouse	Political Party
1	**John Adams** *2nd President of the U.S.*	1787-1801	Abigail Smith	Federalist
